Detailed assessment criteria

Please use the following criteria to inform your ratings

- | | |
|---|--|
| <p>Medical Expertise</p> | <ul style="list-style-type: none"> • Focused clarification of history and examination <ul style="list-style-type: none"> • Correctly identifies relevance of sudden pleuretic chest pain, dyspnoea and syncope • Correctly identifies risk factors of age, smoking or ovarian cancer • Exam focused on patient feeling unwell, diaphoresis, tachycardia, hypotension and right leg more swollen than left leg • ECG <ul style="list-style-type: none"> • Accurately identifies and describes features <ul style="list-style-type: none"> • sinus tachycardia > 140bpm • “classic SIQ3T3” (R axis deviation; deep Qs in III; inverted Ts in III, deep S in I) • Identifies praecordial T inversion • Possible query regarding heart strain • Causes of PE <ul style="list-style-type: none"> • Correctly identifies causes in this patient as a combination of: cancer, age, smoking • Other precipitant possible: any recent injuries • Identification of most likely causes in this patient <ul style="list-style-type: none"> • Combination of cancer, age and smoking • Identification and justification of appropriate investigations <ul style="list-style-type: none"> • Repeat ECG • CTPA (with caution regarding renal function) • Echo • Possible query for ABG • Development of appropriate management plan <ul style="list-style-type: none"> • Oxygen • Judicious IV fluids • Analgesia • Empiric anticoagulant (Heparin –unfractionated or low molecular weight eg Clexane/enoxaparin) |
| <p>Prioritisation and Decision Making</p> | <ul style="list-style-type: none"> • Disposition: <ul style="list-style-type: none"> • Admit to ICU/Resp unit |
| <p>Communication</p> | <ul style="list-style-type: none"> • Guides Registrar to attain all relevant clinical information. • Tailors communication to level of Registrar |

Scholarship and Teaching	<ul style="list-style-type: none">• Teaching/explanation/overall approach of ECG - systematic/appropriate level• Teaching/explanation of investigation and management - comprehensive• Checks understanding
Leadership & Management	<ul style="list-style-type: none">• Effective leadership/clinical supervision of registrar

ⓘ INFORMATION

ECG Station: The participants are the candidate, and a junior registrar assistant. The candidate has received instructions, outside the room, that they are a consultant in a tertiary hospital and have been called by a junior registrar to assist with management of a patient. As part of this they will interpret an ECG. They are to describe and interpret the ECG and instruct the registrar on a differential diagnosis and investigation and management of their patient.

EXAMINER NOTES

Candidate performance notes: Please provide candidate feedback including any areas of strength in their performance and suggestions for how they could improve.

OSCE 'incident reporting' notes: Please provide details if an issue occurs which may influence this candidate's exam outcome e.g. protocol breach, candidate illness etc.

GLOBAL RATING FOR STANDARD SETTING:

This scale is used in the standard setting process for the OSCE. We would like you to make a judgment that is independent of their scores on the adequacy of their performance. This element MUST be completed for the standard of the examination to be set.

Select the ONE BEST option that reflects your judgment of how well the trainee performed in this OSCE station:	Clear fail	Marginal fail	Borderline	Marginal pass	Clear pass
	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
